IT PM
Final Exam
Sample Questions

1. Structure:
    Multiple-choice question:
    - Knowledge memorization
    - Knowledge application quiz

    Short-answer question:
    - Calculation
2. Time:
    About 90 minutes
    ~1 minute per multiple-choice question
    ~3 minute per short-answer question
3. Detailed Information:
    Writing time: 90 minutes

    Examination conditions
    - This is a **semi-open book** examination.
    - Writing is not permitted during reading time.
    - Only non-programmable calculators are permitted.

    Materials permitted
    - **One A4 sheet of notes** (both sides allowed).
    - Draft paper will be provided at the exam venue.
    - Non-programmable calculators.

NOTICE:
Students write the answers directly on the attached Answer Sheet.
Students Must Submit Both The Question Sheet And Answer Sheet.

SECTION A: Multiple Choice

(40 points, 30 questions, ~30 minutes)

SAMPLES

LECTURE 1: INTRODUCTION TO PROJECT MANAGEMENT

1. Which of the following best describes a project?
 a. Ongoing operational activity
 b. A temporary effort to create a unique product
 c. A set of repeated business operations
 d. A departmental procedure

Correct Answer: b

2. What are the three main constraints in project management?
 a. Cost, communication, quality
 b. Scope, team, cost
 c. Scope, time, cost
 d. Risk, time, schedule

Correct Answer: c

3. Which of the following is NOT a PMBOK knowledge area?
 a. Integration
 b. Innovation
 c. Cost
 d. Procurement

Correct Answer: b

4. Project success is typically measured by:
 a. Finishing under budget
 b. Meeting scope, time, and cost goals
 c. Keeping the team happy
 d. Avoiding all risks

Correct Answer: b

LECTURE 2: PROCESS GROUPS, LEAN, AGILE

1. Which process group occurs first in a typical project life cycle?
 a. Planning
 b. Executing
 c. Initiating
 d. Monitoring
Correct Answer: c

2. Which is a key principle of Agile methodology?
 a. Strict documentation
 b. Detailed upfront planning
 c. Customer collaboration
 d. Hierarchical team structure
Correct Answer: c

3. Kanban emphasizes:
 a. Iterations and sprints
 b. Fixed team roles
 c. Continuous flow and limiting work-in-progress
 d. Prioritized product backlog
Correct Answer: c

4. The Lean concept of ‘waste’ refers to:
 a. Incomplete documentation
 b. Unused features, delays, handoffs
 c. Budget overruns
 d. Feature scope
Correct Answer: b

KNOWLEDGE AREA UNDERSTANDING

1. Scope creep refers to:
 a. Deliverables being under-tested

b. Gradual, uncontrolled changes in project scope
c. Late payment to vendors
d. Incorrect team allocation
Correct Answer: b

2. Which tool helps identify the longest path of dependent tasks in a project?
a. Kanban board
b. Network diagram
c. Critical path method
d. PERT chart
Correct Answer: c

3. In cost management, what does the cost baseline represent?
a. The total estimated cost including all reserves
b. A schedule of expected spending over time
c. The approved budget for the project, excluding management reserves
d. A running total of actual and future costs based on project progress
Correct Answer: c

4. Which is a typical output of the risk analysis process?
a. Communication matrix
b. Sprint backlog
c. Risk matrix
d. Work breakdown structure
Correct Answer: c

5. Which contract type has the most risk for the buyer?
a. Fixed price
b. Cost-reimbursable
c. Time & materials
d. Unit-based
Correct Answer: b

6. In the RACI matrix, ‘A’ stands for:

a. Available

b. Accountable

c. Assigned

d. Active

Correct Answer: b

7. What is the main purpose of Earned Value Management (EVM)?

a. To calculate employee bonuses

b. To estimate resource availability

c. To monitor project performance and forecast completion

d. To track vendor invoices

Correct Answer: c

8. The most flexible constraint in the triple constraint triangle is usually:
a. Scope
b. Time
c. Cost
d. None (all are interdependent)

Correct Answer: d

SECTION B: Calculations / Short Answer

(60 points, 20 questions, ~60 minutes)

SAMPLES: See the exercises at the end of each lecture slides

- **Lecture 4: Project Scope Management**
  - Compound interest, NPV, ROI, payback analysis, etc.
  - Note: ROI, payback analysis all use “present” value
- **Lecture 5: Project Schedule Management**
  - Network diagram AOA/AON, critical path, earliest start, latest start, total float, free float, etc.
- **Lecture 6: Project Cost Management**
  - EVM all metrics, etc.
- **Lecture 7: Project Risk Management**
  - Decision tree, EMV, expected profit/loss, risk-adjusted ROI, etc.
