IT Project Management

Course Overview

Dr. Hung-Nghiep Tran
nghiepth@uit.edu.vn

University of Information Technology, VNU-HCM, Vietnam
2025-2026

About me

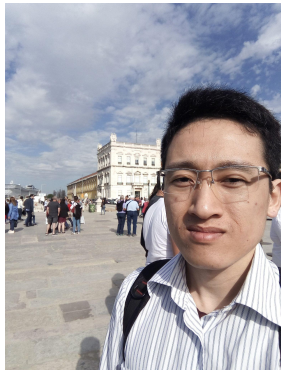
- Trần Hưng Nghiệp

- PhD specialized in Machine Learning and AI
- Research training and work in Japan

- Teaching in the UIT, Faculty of Information Systems:
  - Data Mining, Social Network Analysis, etc.

- Topics in my research group:
  - Knowledge Graphs and Graph Learning
  - Search and Recommender Systems
  - Large Language Models (LLMs)
  - Data Science, Machine Learning, AI, NLP, Computer Vision, and other topics

- Students can reach me at: nghiepth@uit.edu.vn or thnsci@gmail.com



Research trip in Europe

About this course:
General information

- Class name: IT Project Management
- 3 credits
  - Main class: 11 sessions
  - Lab work: 6 sessions
- Language: English
- Be active in class, on course website, when working on your project

About this course:

Evaluation

- Final Examination: 50%, closed-book written test
- Project: 30%
  - **Develop, manage, and report on an imaginary "mock project"**
    - Group work (3 to 4 students), done in the lab classes
- Assignments: 20%
  - **Class attendance**, assignments at class / at home
  - **Survey & present a project management tool**: introduction, features, how to use
    - Individual work, short presentation, ~10 slides, ~5 minutes
  - **Lean / Agile workshop** to develop an AI application
    - Group work (~10 students), done in week 2-3 of the class

About this course:

Evaluation: Lean / Agile workshop to develop an AI application

- **Purpose:** roleplay, simulate, practice Lean / Agile in a real project process
- **Evaluation criteria:**
  - Idea: select a topic, list the features, identify and pitch key features
  - **Project process**: **roleplay**, **simulate**, **practice** Lean / Agile
    - members roleplay and simulate the project process to your best effort
    - for Lean: focus on designing, building, and pitching the MVP
    - for Agile: simulate Scrum method, communicate and collaborate
  - Final product (bonus): UI/UX design, app simulation, or MVP (optional)
    - with some key features that define your idea
- **Work in class and at home**
- **Short presentation:** ~15 slides, 15 minutes
    - topic, features, pitching idea
    - roles, each member's work, communication, data input/output, work result
    - demo design / simulation / or MVP

About this course:

Content

- Introduction to Project Management and Project Process
- Project Management knowledge areas:
  - Project **Integration** Management
  - Project **Scope** Management
  - Project **Time** Management
  - Project **Cost** Management
  - Project **Quality** Management
  - Project **Human Resource** Management
  - Project **Communications and Stakeholder** Management
  - Project **Risk** Management
  - Project **Procurement** Management
- Special topics:
  - Lean Approach
  - Agile, Scrum and Kanban

About this course:

References

- Tools:
  - Project Management
    - **Microsoft Projects**, Project manager, Click up, Trello, etc.
  - Collaborative
    - Github, Zalo, Slack, Zoom, etc.
  - Utilities
    - Draw.io, Offices, etc.
