

Chapter 6

Human Resource Process

Learning objectives

- Human Capital Management in SAP ERP.
- Advanced SAP ERP Human Resources Features.
- Human Capital Management Process in SAP S/4HANA.
- Human Capital Management Process in SAP S/4HANA (using Global Bike).

1. Human Capital Management in SAP ERP

Solution Map of SAP ERP

- The SAP ERP solution map

Functionality
of SAP ERP

	End-user service delivery								Shared service delivery	SAP NetWeaver
Analytics	Financial analytics		Operations analytics		Workforce analytics					
Financials	Financial supply chain management	Treasury		Financial accounting	Management accounting		Corporate governance			
Human capital management	Talent management		Workforce process management		Workforce deployment					
Procurement and logistics execution	Procurement	Inventory and warehouse management		Inbound and outbound logistics		Transportation management				
Product development and manufacturing	Production planning	Manufacturing execution		Product development		Life-cycle data management				
Sales and service	Sales order management		Aftermarket sales and service		Professional-service delivery					
Corporate services	Real estate management	Enterprise asset management	Project and portfolio management	Travel management	Environment, health, and safety compliance management	Quality management	Global trade services			

Human Capital Management

- The goal of human capital management (HCM), previously known as human resources (HR), is to find the best ways to utilize the potential and productivity of employees.
- HCM is a vast part of SAP ERP. It offers a comprehensive spectrum, from recruiting to assignment, qualification, and retaining employees in a company.
- The ERP solution map defines the major areas of HCM as follows:
 - ❖ Talent management.
 - ❖ Workforce process management.
 - ❖ Workforce deployment.

Human Capital Management – Talent Management (Cont.)

- Talent management covers the life cycle of the relationship between employees and the company.
 - ❖ Attracting and acquiring talent, hiring, allocating tasks and responsibilities, payment strategies, evaluations, training, and qualification, etc.
- The most important processes and tasks consist of recruitment.
 - ❖ Career and succession management, company-wide training (i.e., e-learning).
 - ❖ Employee performance management (tying compensation to performance based on corporate goals and strategies).
 - ❖ Compensation management and supporting diverse compensation schemes.

Human Capital Management – Workforce Process Management (Cont.)

- Workforce process management supports important human resources tasks.
 - ❖ Personnel administration (i.e., providing a central repository for employee data).
 - ❖ Payroll and legal reporting (i.e., handling payroll processes subject to legal regulations and collective agreement specifications, considering national rules and regulations).
 - ❖ The organizational management (i.e., managing organizational structures and policies).

Human Capital Management – Workforce Process Management (Cont.)

- Workforce process management supports important human resources tasks.
 - ❖ Global employment (i.e., managing international transfers and assignments).
 - ❖ Benefits management (i.e., defining and administering every type of benefit plan).
 - ❖ Health benefits management (i.e., managing healthcare expenses for benefits).
 - ❖ Time and attendance (i.e., planning, managing, and evaluating working times and activities of internal and external employees).

Human Capital Management – Workforce Deployment

- Workforce deployment provides support for creating project teams based on many features.
 - ❖ Skills and availability.
 - ❖ Eliminating redundant or ineffective projects.
 - ❖ Monitoring project progress, tracking time, analyzing results.
 - ❖ Making efficient use of resources and managing the workforce efficiently.

Human Capital Management – Workforce Deployment (Cont.)

- The processes and tasks are divided into three parts.
 - ❖ Project resource planning (i.e., targeted toward service companies that work in a project-oriented manner).
 - ❖ Resource and program management integrates resource management, project portfolio management, project execution, and skills management.
 - Aids in searching and allocating internal and external professionals to projects and service engagements.
 - ❖ Retail scheduling supports the scheduling of retail staff based on customer volume, shift schedules, and skills.

In conclusion

- Human Capital Management.
 - ❖ Talent management.
 - ❖ Workforce process management.
 - ❖ Workforce deployment.

Understand

2. Advanced SAP ERP Human Resources Features

Time Management

- ***Hourly employees***
 - ❖ Paid for each hour worked.
 - ❖ Must record time that they work.
- ***Salaried employees***
 - ❖ Not paid based on hours worked.
 - ❖ Their time worked usually must be tracked as well.
- ***SAP ERP system uses Cross Application Time Sheets (CATS) to:***
 - ❖ Record employee working times.
 - ❖ Provide the data to applications, such as SAP Controlling module; SAP Payroll module; and SAP Production Planning module.

Payroll

- **Remuneration elements** of an employee's pay
 - ❖ Base pay, bonuses, gratuities, overtime, sick pay, and vacation allowances.
- **Statutory and voluntary deductions**
 - ❖ Taxes (federal, state, local, Social Security, and Medicare), company loans, and benefit contributions.
- **Payroll run:** process of determining each employee's pay
 - ❖ SAP ERP system evaluates input data and notes any discrepancies in **error log**.

Travel Management

- Travel request may originate with employee or employee's manager.
- Travel requests usually require management approval.
- Once travel request is approved, travel reservations must be made.
- SAP ERP Travel Management system
 - ❖ Maintains travel data for each employee, including flight, hotel, and car preferences
 - ❖ Integrates travel data with:
 - Payroll module for reimbursements.
 - Financial Accounting and Controlling modules to properly record travel expenses.

Training and Development

- In SAP ERP system, employee development is driven by qualifications and requirements
 - ❖ **Requirements:** skills or abilities associated with a position.
 - ❖ **Qualifications:** skills or abilities associated with a specific employee.
- One of the most important reasons for managing the development and training of employees is **succession planning**, such as creating, implementing, and evaluating succession planning scenarios.
- Succession plan outlines a strategy for replacing key employees when they leave the company.

Mobile Time Management

- Many employees may not have regular access to a PC.
- Mobile Time Management allows employees to use cellular phones to:
 - ❖ Record their working times.
 - ❖ Record absences.
 - ❖ Enter a leave request.
 - ❖ Check their time charge data.

Management of Family and Medical Leave

- Human Resources module reduces administrative burden imposed by Family and Medical Leave Act (FMLA) of 1993.
- HR system can:
 - ❖ Determine whether an employee is eligible to take FMLA absences.
 - ❖ Automatically deducts those absences from the days the employee takes from allowable leave.

Domestic Partner Handling

- Human Resources module now supports the management of benefits for domestic partners and their children
- Provides more flexibility in:
 - ❖ Customizing dependent coverage options for health plans.
 - ❖ Eligibility for enrollment of dependents.
 - ❖ Designation of beneficiaries.

Administration of Long-Term Incentives

- Companies must account for expected costs that occur because of long-term incentives such as the exercising of stock options.
- Human Resources module now provides more options for processing long-term incentives.
 - ❖ Integration with SAP Payroll module
 - Can calculate taxes accurately when employees exercise incentives and sell their shares in the company.
 - ❖ SAP can share incentive data with Accounting.

Personnel Cost Planning

- Personnel Cost Planning tool
 - ❖ Allows HR personnel to define and evaluate planning scenarios to generate cost estimates.
- Performing cost planning and simulation
 - ❖ Allows HR to forecast cost estimates by integrating data with other SAP ERP modules.

Management and Payroll for Global Employees

- Management of global employees involves many complicated issues
 - ❖ Relocation plans, visas and work permits, housing, taxes, bonus pay.
- SAP ERP has enhanced features to support the management of these issues
 - ❖ Customized functionality for more than 50 countries.

Management by Objectives

- Management by objectives (MBO)
 - ❖ 1954: first outlined by Peter Drucker in *The Practice of Management*
 - ❖ Managers encouraged to focus on results, not activities, and to “negotiate a contract of goals” with their subordinates without dictating the exact methods for achieving them.
- SAP ERP provides a comprehensive process to support the MBO approach
 - ❖ Performance appraisals
 - Appraisal results can affect employee’s compensation.
 - ❖ Managers can include results of achieved objectives in the employee’s qualifications profile.

In conclusion

- Time management.
- Payroll processing.
- Travel management.
- Training and development.
- Mobile Time Management.
- Personnel Cost Planning.
- MBO.
- Etc.

Understand

3. Human Capital Management Process in SAP S/4HANA

3.1. HCM Organizational Structure

HCM Organizational Structure

- Represents the structural and personnel organization of a company.
- Consists of organizational units.
- Illustrates the organizational structures and hierarchies.
- Illustrates an employee's responsibilities.
- Is a precondition of various personnel processes' implementation.
- Consists of three parts:
 - ❖ Enterprise Structure.
 - ❖ Personnel Structure.
 - ❖ Organizational Plan.

HCM Enterprise Structure

- Represents formal and financial structures in a company.
- Each employee needs to be assigned to an enterprise structure.
- Basically, consists of company code, personnel area, and personnel subarea.

❖ ***Client***

- An independent environment in the system

❖ ***Company Code***

- Smallest org unit for which you can maintain a legal set of books

HCM Enterprise Structure (Cont.)

- Basically, consists of company code, personnel area, and personnel subarea.

❖ *Personnel Area*

- Represents a company area differentiated between personnel administrative, time management, and expensive organizational aspects.

❖ *Personnel Subarea*

- Represents part of a personnel area.
- Represents a company area differentiated between personnel administration, time management, and payroll accounting aspects.

Global Bike Enterprise Structure for HCM

HCM Personnel Structure

- Describes an employee's position within the company.
- Is defined by employee group and employee subgroup.

❖ *Employee Group*

- Organizational unit for which personnel related regulations can be specified.
- Examples:
 - ☐ Active employees.
 - ☐ External.
 - ☐ Retirees.

❖ *Employee Subgroup*

- Organizational unit within the employee group, for which personnel related regulations are specified.
- Examples:
 - ☐ Industrial employees.
 - ☐ Commercial clerks.
 - ☐ Laboratory assistants.

HCM Personnel Structure (Cont.)

HCM Organizational Plan

- Describes in which function an employee is acting.
- Is object-oriented (i.e., each element is represented by an object).
- Objects can be assigned to each other.
 - ❖ Organizational Unit
 - Can be grouped according to functional and regional aspects.
 - ❖ Position
 - Are assigned to organizational units and filled by employees.
 - Example: Position accounting clerk in the Accounting Department.

HCM Organizational Plan (Cont.)

- Objects can be assigned to each other.
 - ❖ Person
 - Are employees and fill positions.
 - ❖ Cost Center
 - Originate from Controlling and can be linked with positions or organizational units.
 - ❖ Job
 - General description of tasks which an employee should perform.
 - Are assigned to positions.
 - Example: Position Head of Department.

HCM Organizational Plan (Cont.)

3.2. HCM Master Data

HCM Master Data

- **Personnel number**

- ❖ Is used in SAP as a central identifier for an employee.
- ❖ Can comprise up to eight digits.
- ❖ Can be assigned either by the system or manually.
- ❖ All employee data available in the system is identified based on the personnel number.

HCM Master Data (Cont.)

- **Reference Personnel Number**

- ❖ Helps to map different contractual relationships.
- ❖ Creates an existing employee again in the system with a new personnel number.
- ❖ The old personnel number serves as a reference personnel number.
- ❖ Certain data can be copied and assigned to the new number.
- ❖ In the case of concurrent employment, the employee is identified through a person ID.

HCM Master Data (Cont.)

- **Infotypes**

- ❖ HR master data are structured in infotypes.
- ❖ They are collections of data fields that are logically linked.
- ❖ They process employee data in an effective structure in accordance with business requirements.
- ❖ Each infotype has an explicit four-digit ID, e.g., infotype Addresses 0006.
- ❖ An infotype can have sub types, which represent a sub variant of the infotype.

Time Constraints of Infotypes

- Infotypes are time dependent.

Time constraint 1

e.g. permanent residence

Time constraint 2

e.g. husband

Time constraint 3

e.g. secondary residence

Maintenance of Infotype

- Infotypes can be maintained in three different ways.

ESS/MSS

Roles

HCM Processes – Organizational Management

- Model the organizational structure of your enterprise.
- Create, change and delimit organizational units.
- Create, change and delimit jobs.
- Create, change and delimit positions.
- Analyze an organizational unit to define.
- Workforce requirements and personnel cost planning.
- Create further organizational units for planning.
- Scenarios or simulations.

HCM Processes – Personnel Administration

- Creating and maintaining personnel master data.
- Plausibility checks.
 - ❖ may be performed to detect errors.
 - ❖ prevent the transfer of incorrect data.
- Automatic history
 - ❖ is created when changing master data.
 - ❖ may be used for reporting and the verification of data integrity.
- Personnel administration sets the data basis for subsequent processes in Human Resource Management and reporting.

HCM Processes – Recruitment

- Recruitment, choice and selecting of applicants.
- External recruitment.
- Internal recruitment.
- Developing a data base for applicants.
- Administration of vacant positions.

Recruitment – Organizational Assignment

- Applicants are assigned to the elements of the applicant structure.

Applicant Group

Structures applicants according to the type of their employment relationship

Actives

Working students

Applicant Range

Classifies applicants according to hierarchical or functional criteria

Employees

**Leading
employees**

Specialist

Recruitment – Applicant Data

- Maintaining applicant data can be done in infotypes with the help of the Initial Data Entry or Application Actions.

☐	Invite applicant

Recruitment – Process

Recruitment – Selection Procedures

- In SAP HCM, two types of selection procedures are distinguished:

HCM Processes – Personnel Development

- Advance qualifications of employees.
- Comparison: requirements of positions with qualifications of employees → profile matchup identify further training need.
- Introduce development actions → Talent Management.
- Book training course → Training and Event Management.
- Arrange appraisals → Performance Management.

Personnel Development – Qualifications

- Qualifications can be connected to persons or positions.
- Need to be attached with attributes.
- Can have a half-life period or a validity period.

Personnel Development – Qualifications Catalog

- Qualifications are defined in the qualifications catalog.
- It can be maintained in Customizing.
- The structure may consist of qualification groups, classifying similar qualifications.

- Requirements can be attached to positions.
- Requirements are qualifications, knowledge, and experiences.
- Requirements can be created with a characteristic.

Display Qualification

Qualification

Scale: Points Scale (1-5)

Personnel Development – Profile Matchup

- With the help of the profile matchup, persons, positions and jobs can be compared to each other.
- The difference between the characteristic of a requirement and the characteristic of a qualification is determined 3 results are possible:
 - ❖ Both characteristics are identical.
 - ❖ The requirements are higher than the qualification (=underqualification).
 - ❖ The requirements are lower than the qualification (=overqualification).

HCM Processes – Talent Management

- Arrange Career Planning.
- Accomplish Succession Planning.
- Generate general Development Plans.
- Generate individual Development Plans.

Talent Management – Career Planning

- Identify career goals.
- Plan career.
- Define and develop special stations of a career.
 - ❖ Job.
 - ❖ Position.
 - ❖ course of instruction.
- Career planning: comparing qualifications with requirements of one station of a career, e.g. job, position → Personnel decisions, courses of instruction, etc.
- Derivate individual plans.

Talent Management – Career Planning (cont.)

- Example for Career Planning

Talent Management – Succession Planning

- Assure continuity in personnel allocation for key positions.
- Proactive search for candidates to reallocate key positions.
- Well-directed preparation on adoption of following job.

Talent Management – Development Plans

- Summarizing teaching and further education actions to achieve special qualifications.
- Participation in instruction courses.
- Allocation of positions.
- Use in an organizational unit.
- Habitation in a location.

HCM Processes – Performance Management

- Define objective setting between enterprise and employees.
- Evaluate benefit of employees
 - Feedback.
 - Have goals been achieved?
- Supervise operative goals of employees.
- Adjust bonuses.
- Goal: higher motivation and better benefits.

Performance Management – Process of Appraisal

Performance Management – Status

- To display a performance feedback process, appraisals and objective settings may have different statuses.
 - ❖ In Preparation: an appraisal template has been created and provided with header data (e.g. appraiser, validity).
 - ❖ In Process: an appraisal has been given but it is not completed, the evaluation may still be changed.
 - ❖ Completed: The appraisal is finished.
 - ❖ Approved: The appraisal has been approved.
 - ❖ Rejected: the appraisal has been rejected.

Appraisal Status		
☐ In Preparation	☐ In Process	
☐ Completed	☐ Approved	☐ Rejected

Performance Management – Appraisal Template

- The Appraisal Template comprises different elements:
 - ❖ Formulas.
 - ❖ Criteria groups.
 - ❖ Criteria.
 - ❖ Qualifications.

The screenshot displays the SAP 'Perform Appraisal - Individual Performance Appraisal' interface. At the top, there's a navigation bar with the SAP logo and a title bar. Below this, a dropdown menu is set to 'Complete', with other options like 'List', 'Print', and 'More' visible. The main form area contains several input fields: 'Individual appraisal:' with the value 'Individual Performance Appraisal', 'Supervisor:' with 'Marco Romero', and 'Employee:' with 'Marco Romero'. A status indicator 'In Process' is shown to the right. Below these, the 'Period appraised:' is set from '01.01.2017' to '31.12.2017', and the 'Created on:' date is '28.05.2018'. A table at the bottom lists appraisal criteria with columns for Name, Weight, Rating, Rating text, a calculated value (weighting * rating), and a Note column. The table includes a header row and four data rows for 'Individual Performance Appraisal' and its sub-criteria: '1. Timeliness', '2. Flexibility', '3. Interpersonal Skills', and '4. Fitness'.

I...	Name	Weight...	Rating	Rating text	= weighting * rati...	Note
	Individual Performance Appraisal				0,000	
	1. Timeliness	1,00	3	Satisfactory	3,000	
	2. Flexibility	1,00	5	Poor	5,000	
	3. Interpersonal Skills	1,00	1	Very Good	1,000	
	4. Fitness	1,00	1	Very Good	1,000	

HCM Processes – Personnel Controlling

- Reports and Analysis.
- Evaluation of personnel data.
 - ❖ Standard reports.
 - ❖ Human Resource Information System.
 - ❖ Manager's Desktop.
 - ❖ Ad-hoc Query.
 - ❖ Business Intelligence.

Data Processing	Create, edit, delete and display	display

Employee Self-Service (ESS)

- Web-based user interface for employees.
- Enables the time and location independent maintenance of personal data.
- Provides access to several administrative functions, which usually are taking care of by other departments.
- The employees themselves are responsible for updating their data.
- Employees can do following activities by ESS:
 - ❖ Submitting travel expenses.
 - ❖ Browsing the employee directory.
 - ❖ Displaying the calendar.
 - ❖ Updating of personal data.
 - ❖ Applying for employer benefits.
 - ❖ Documenting of working hours.
 - ❖ Updating of bank data.
 - ❖ Register for training courses.

Manager Self-Service (MSS)

- Central web-based access point for managers.
- MSS uses the backend systems of the human resources and finance departments and supports the management with enterprise-wide relevant information.
- The self-service tools automate paper-based processes, e.g. inquiries regarding master data changes or performance assessments.
- Managers can do following activities by MSS:
 - ❖ Gaining information.
 - ❖ Hiring employees.
 - ❖ Carrying out compensation planning.
 - ❖ Controlling costs.
 - ❖ Manage the budget and human resource planning.
 - ❖ Change personal data.

In conclusion

- HCM Organizational Structure.
- HCM Master Data.
- HCM Processes
 - ❖ Organizational Management.
 - ❖ Personnel Administration.
 - ❖ Recruitment.
 - ❖ Personnel Development.
 - ❖ Talent Management.
 - ❖ Performance management.
 - ❖ Personnel Controlling.
 - ❖ ESS/MSS.
