Content

- Exam Format
- Main Topics

Exam Format

- Structure:
 - Multiple choices:
 - Knowledge memorization
 - Knowledge application quiz
 - Short answer:
 - Calculation
- Time:
 - About 90 minutes
 - About 1-2 minutes a question

Main Topics

Multiple-choice question

- Lecture 1: Introduction to Project Management
 - Project success and failure criteria
 - What is a project? What is project management?
 - Project attributes, the triple constraints, 10 knowledge areas
- Lecture 2: Project Process, Lean, and Agile
 - Project life cycle, 5 process groups, 7 stages
 - Traditional approach: Predictive Life Cycle Models
 - Modern approach: Lean and Agile, Scrum, Kanban, Extreme programming

Main Topics

Multiple-choice question

All other lectures:

- About specific knowledge areas:
 - Project scope management, time management, cost management, quality management, risk management, etc.
 - What is it? Its key steps and the content of each step?
 - The relations between scope, cost, time, quality goals and constraints (e.g., increasing scope causes increasing time and cost, etc.)
- All concepts: scope creep, critical path, critical chain method, fast tracking, crashing, etc.: definitions, properties, and key ideas
- All tools: risk matrix, SWOT analysis, SMART milestones, etc.

Main Topics

Short-answer calculation

Calculation:

- Lecture 4: Project Scope Management
 - Net Present Value, Return on Investment, Payback Analysis
- Lecture 5: Project Schedule Management
 - Critical Path Analysis, network diagrams, etc.
- Lecture 6: Project Cost Management
 - Earned Value Management (EVM)
- Lecture 7: Project Risk Management
 - Expected Monetary Value (EMV)

Main Topics

Short-answer calculation

Calculation:

- Your answer will be evaluated on **4 components**:
 - Correct formula
 - Correct input value
 - Correct calculation
 - Final correct answer
- You should write all each solution concisely in the blank space on the question sheet

Thank you for listening
