

Homework: Quality Management Report IT Project Management

Exercise: Fishbone Diagram Analysis

Student Name: Trần Anh Tuấn

Student ID: 24521943

Course ID: MSIS3033.Q21.CTTT

May 3, 2026

Exercise 1: Fishbone Diagram Analysis

The Issue: Students missing assignment deadlines.

Objective: Identify root causes using a Fishbone (Ishikawa) diagram across five categories (People, Process, Materials, Equipment, Environment) and suggest corresponding fixes.

1. Cause and Effect Diagram

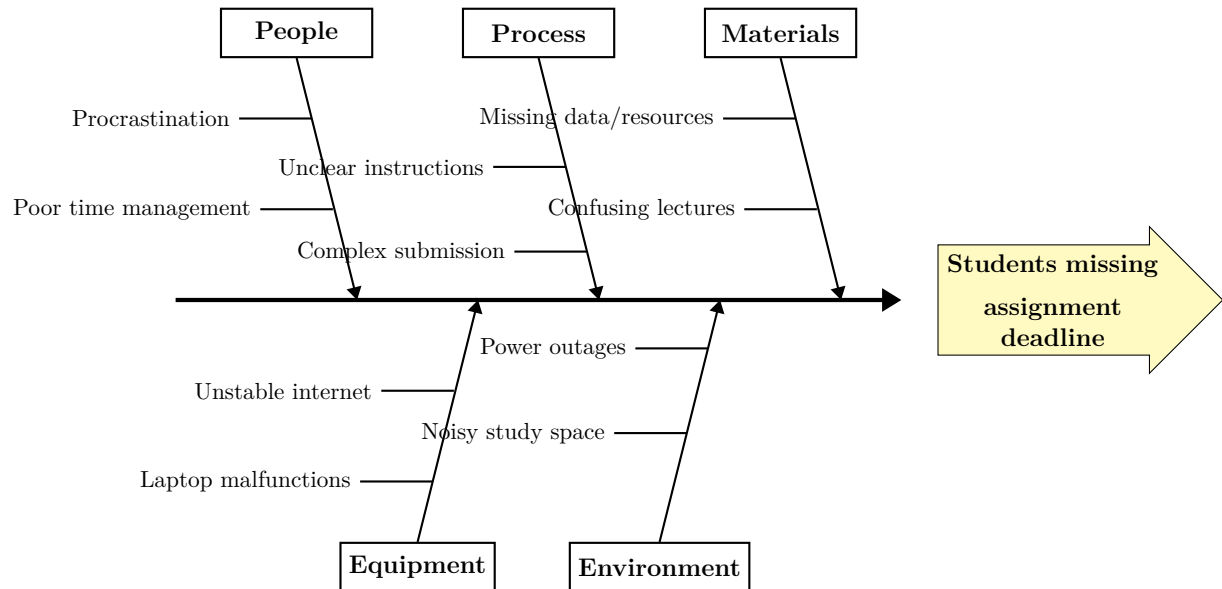

Figure 1: Fishbone Diagram illustrating root causes for missing deadlines.

2. Identified Root Causes and Suggested Fixes

Category	Identified Root Causes	Suggested Fixes
People	Procrastination, Poor time management	Instructors can break down large assignments into smaller milestones with staggered deadlines. Students should be encouraged to use time management techniques.
Process	Unclear instructions, Complex submission procedure	Provide a comprehensive grading rubric and detailed instructions. Simplify the submission process by utilizing a single, unified LMS platform.
Materials	Missing data/resources, Confusing lectures	Ensure all necessary datasets and reference materials are fully accessible before assigning the task. Provide supplemental video tutorials.
Equipment	Laptop malfunctions, Unstable internet connection	Encourage students to utilize cloud storage for continuous backups. Inform students about university computer labs available as a backup.
Environment	Noisy study space, Power outages	Encourage students to utilize designated quiet zones. Advise students to aim for completing assignments prior to the deadline to buffer against unexpected issues.

Table 1: Root Causes and Suggested Fixes matrix (Exercise 1).

Exercise 2: Fishbone Diagram Analysis

The Issue: Students are too noisy and talk loudly in class.

Objective: Identify root causes using a Fishbone diagram across five categories and suggest corresponding fixes.

1. Cause and Effect Diagram

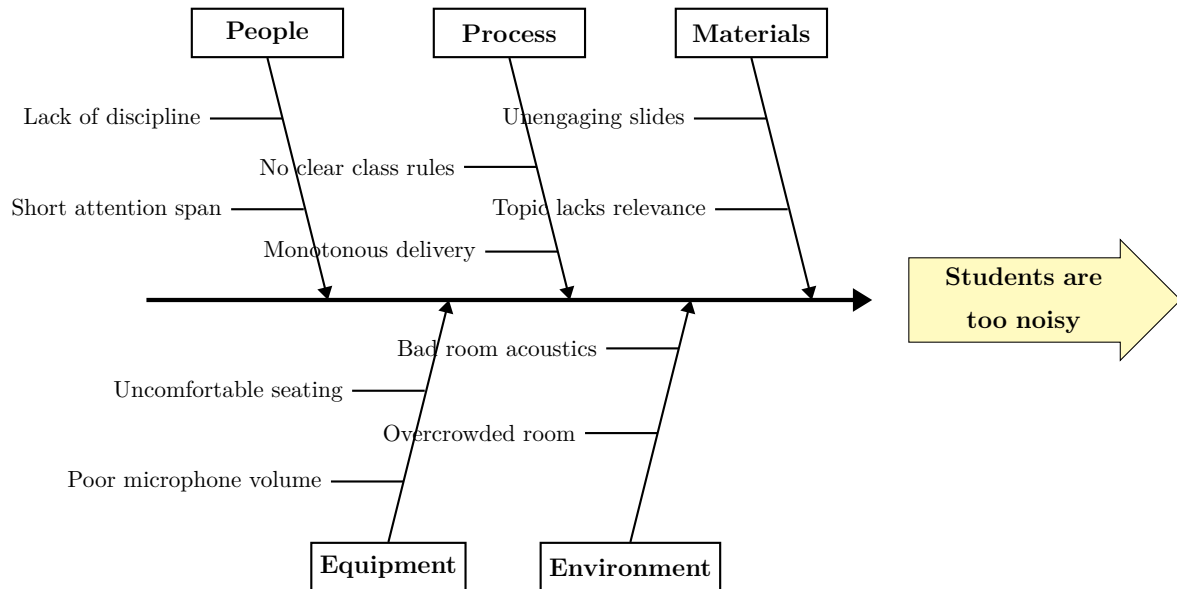

Figure 2: Fishbone Diagram illustrating root causes for noisy students.

2. Identified Root Causes and Suggested Fixes

Category	Identified Root Causes	Suggested Fixes
People	Lack of discipline, Short attention span	Implement interactive activities (quizzes, group discussions) to keep students engaged. Separate chatty groups.
Process	No clear class rules, Monotonous delivery	Establish strict ground rules regarding talking on the first day. Incorporate short breaks during long lectures.
Materials	Unengaging slides, Topic lacks relevance	Use multimedia (videos, case studies) to make materials more visually appealing and relatable to real-world scenarios.
Equipment	Poor microphone volume, Uncomfortable seating	Ensure the classroom AV system is functioning properly so the instructor's voice carries. Adjust seating arrangements if possible.
Environment	Overcrowded room, Bad room acoustics	Request a room change to a venue with better acoustics or tiered seating to naturally direct attention forward.

Table 2: Root Causes and Suggested Fixes matrix (Exercise 2).

Exercise 3: Fishbone Diagram Analysis

The Issue: US places very high tariffs on Vietnam's exports.

Objective: Identify root causes using a Fishbone diagram across five categories and suggest corresponding fixes.

1. Cause and Effect Diagram

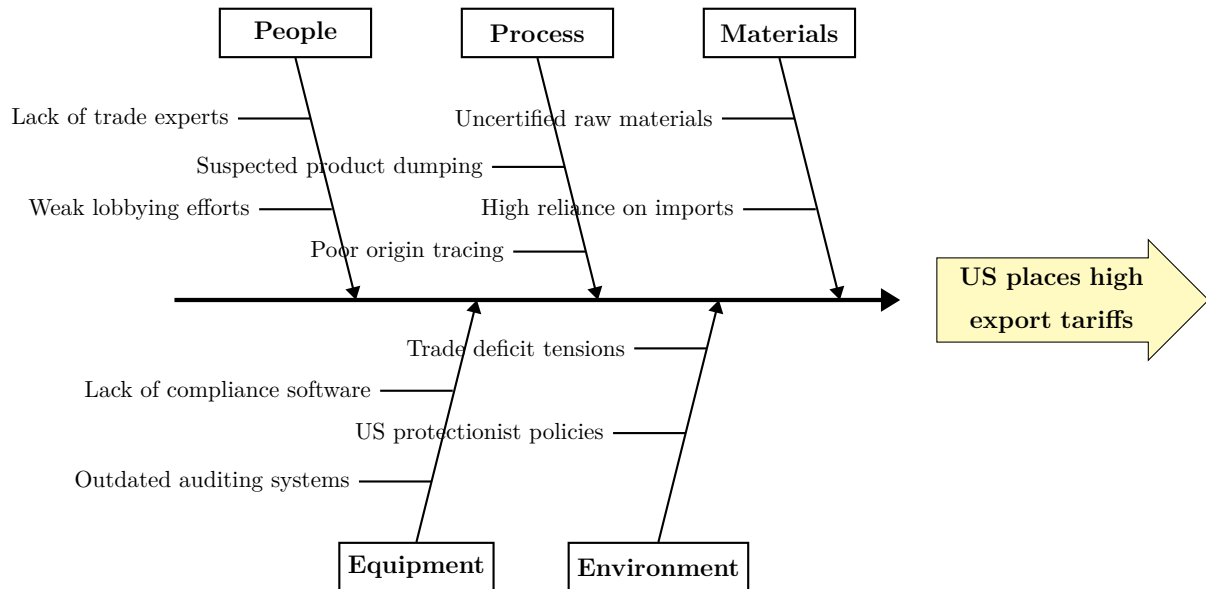

Figure 3: Fishbone Diagram illustrating root causes for high export tariffs.

2. Identified Root Causes and Suggested Fixes

Category	Identified Root Causes	Suggested Fixes
People	Lack of trade experts, Weak lobbying efforts	Invest in training international trade lawyers and engage professional lobbying firms to represent Vietnamese interests in the US.
Process	Suspected product dumping, Poor origin tracing	Implement transparent accounting practices compliant with WTO standards. Establish strict origin-tracing procedures to prove fair market value.
Materials	Uncertified raw materials, High reliance on imports	Localize the supply chain by sourcing raw materials domestically to avoid accusations of transshipment from third countries.
Equipment	Outdated auditing systems, Lack of compliance software	Upgrade to modern Enterprise Resource Planning (ERP) systems to automate compliance reporting and ensure data accuracy for audits.
Environment	US protectionist policies, Trade deficit tensions	Diversify export markets (e.g., EU, Japan) to reduce reliance on the US market. Enhance bilateral diplomatic negotiations.

Table 3: Root Causes and Suggested Fixes matrix (Exercise 3).
